Driving Licence

B

I am a Computer Engineering graduate with two years of software development experience. I have worked on web and mobile application development, software testing, and automation. I have taken part in various projects using React, Java, JavaScript, TypeScript, and Python, and have been involved in many stages of the development process. In the future, I aim to further develop my experience, take on responsibilities within a collaborative team, and gradually move into leadership positions.

EDUCATION

Bachelor's Degree in Computer Engineering

Duzce University, Duzce (GPA: 3.00 / 4.00)

Sep 2020 - Jun 2025

Trabzon Faruk Basaran Science and Art Center

Project Production and Management Program, Trabzon

Sep 2012 - Jun 2019

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

OBSS Technology, Istanbul

Jul 2025 – Sep 2025

- Developing responsive user interfaces (React, TypeScript, Vite, HTML5, CSS3)
- Building and publishing a custom component library to npm (Rollup, Storybook)
- Implementing interactive maps (CesiumJS)
- Managing application state (Redux Toolkit)
- Integrating RESTful APIs and WebSocket for real-time data updates
- Adding multi-language (TR/EN) and theme (Light/Dark) support with persistent settings
- Creating filtering, sorting, and role-based access control features
- Writing and maintaining unit tests (Vitest)
- Collaborating in Agile teams using Bitbucket for version control and participating in code reviews

Software Developer Intern

Testinium, Istanbul

Aug 2024 - Sep 2024

- Preparing and updating test scenarios
- Designing and developing the test automation framework (Selenium, Appium)
- Writing and maintaining test scripts
- Setting up and managing the test environment
- Analyzing and reporting test results
- Integrating test automation into CI/CD processes
- Proficiency in Java, Selenium, Appium, JUnit, TestNG, Postman, and RESTful APIs
- Ability to perform API tests with Postman, including sending API requests, validating responses, and creating test scenarios.

Frontend Developer Intern

Kafkal Software Company, Istanbul

Aug 2022 - Nov 2022

- Developing user interfaces (UI) using HTML, CSS, and JavaScript
- Creating responsive designs with the Bootstrap framework
- Developing, updating, and testing web interfaces

PROJECTS

CitHub: github.com/resulbeser

Air Command System

Developed a real-time aircraft monitoring web application using React, Vite, and CesiumJS. Built and published a custom component library (Rollup), managed state with Redux Toolkit, and integrated RESTful APIs & WebSocket. Added multi-language/theme support, filtering, and role-based access control. Wrote unit tests with Vitest and used Bitbucket for version control.

Test Automation Application

In this test automation project developed with Java and Maven, functional and performance tests of certain websites were automated using Selenium 4 and Gauge frameworks. Selenium was used for interactive tests; Gauge was used for writing and managing test scenarios. The project aims to speed up testing processes and increase accuracy.

Restful API Project

In this project I developed using Java and Maven, I created a RESTful API that collects commit details from GitHub, Bitbucket, Azure DevOps and GitLab. The API was designed to add this data to the PostgreSQL database. Tested with Postman, the API provides an integrated solution for monitoring software development processes and performing data analysis.

TECHNICAL SKILLS

- **Programming:** Java, JavaScript, TypeScript, Python Web
- **Development:** React.js, HTML5, CSS3, Vite, Bootstrap, TailwindCSS, ESLint, Prettier
- **Mapping & Visualization:** CesiumJS
- **Databases:** PostgreSQL, SQL, MongoDB
- **Testing & Automation:** Selenium 4, Gauge, Vitest, JUnit5, Postman
- **DevOps/CI-CD:** Maven, Docker, Jenkins, Bitbucket, Jira
- **Concepts:** OOP, Agile, RESTful APIs

CERTIFICATES

Dijitalpark Teknokent

Digital Leadership and Management Skills
Business Plan Preparation and Business Model Development
Teamwork Training
Foreign Trade E-Commerce and E-Export
Training for Entrepreneurs
Legal Training for Entrepreneurs
Protection of Personal Data KVKK Training

Udemy

Apache Maven
DevOPS CI/CD for Beginners
Jenkins: Beginners To Pro
Learning SQL with Applications
Oobeya Product Training

INTERESTS AND CLUBS

Duzce University Teknofest Club

Led project teams in competitions such as Teknofest. Served as Vice President. The role concluded upon graduation.
